

Chromira 5xLAB is the all-in-one digital minilab of the future

**VERSATILE
MEDIUM-FORMAT IMAGING**

ZBE has long fulfilled the needs of digital labs requiring state-of-the-art wide-format imaging. For imagers that need an affordable and fully automated highly productive medium-format imaging solution, ZBE offers the new Chromira5x Lab.

The Chromira5x Lab is a fully integrated, 20" digital RA-4 printer/processor lab system, designed to deliver continuous digital print production of precisely assembled and collated orders for the Portrait/Wedding, and Custom imaging market.

The convenience of its daylight-loading feature makes it adaptable enough for today's space-conscious digital mini-labs. Chromira5x Lab produces final cut print sizes from 4x5 to 20x30, auto-nested, sorted, back printed and collated package orders automatically. With high-volume 30 IPM imaging speed, distributed front-end network image submission, an exclusive on-the-fly image processing workflow, and characteristics such as order sorting, collating, daylight loading and back printing, the Chromira5x Lab offers it all.

And with its state-of-the-art, high-resolution, imaging engine, the Chromira5x Lab delivers the high-quality large format prints that will attract new customers and keep existing customers coming back. For even more productivity the Chromira5xe Lab system is compatible with ZBE's powerful WorkStream Imaging Automation software suite which integrates the entire process of order creation, color correction, cropping and retouching, and printing.
